
HOME WORKSTATION AUDIT

Cyber Threat Monitoring Level I — Day 1 Self-Study Task 6

Name: _____ Date: _____

Where you are working: _____ (e.g. bedroom desk, dining table, internet café, office)

Instructions: Check each item where you are actually sitting right now. Mark **PASS** if it is correct, **FAIL** if it is not, or **N/A** if it genuinely does not apply.

Be honest. A sheet with twenty passes and no notes tells your trainer nothing. Failing items are the point of the exercise — analysts sit at screens for eight to twelve hours at a stretch, often at night, and the people who last in this job are the ones who fixed their desk in the first month.

A. Ergonomics

#	Item	PASS	FAIL	N/A	Notes
1	My feet rest flat on the floor when I sit properly	☐	☐	☐	
2	My chair supports my lower back	☐	☐	☐	
3	My screen is about an arm's length away	☐	☐	☐	
4	The top of my screen is at or just below eye level	☐	☐	☐	
5	My elbows are at roughly 90° when I type	☐	☐	☐	
6	My wrists are straight, not bent up or down	☐	☐	☐	
7	I am not working from a bed or a	☐	☐	☐	

	sofa				
8	If I use a laptop, it is raised and I use a separate keyboard	☐	☐	☐	

B. Lighting and Screen

#	Item	PASS	FAIL	N/A	Notes
9	There is no glare or reflection on my screen	☐	☐	☐	
10	The room has light other than the screen itself	☐	☐	☐	
11	A window is not directly behind or in front of my screen	☐	☐	☐	
12	My screen brightness is comfortable, not straining	☐	☐	☐	

C. Electrical and Physical Safety

#	Item	PASS	FAIL	N/A	Notes
13	Power cables are intact — no fraying, no exposed wire	☐	☐	☐	
14	No cable runs across a walkway where someone could trip	☐	☐	☐	
15	My extension cord is not daisy-chained into another one	☐	☐	☐	
16	The power strip is not overloaded	☐	☐	☐	

17	There are no drinks positioned where a spill would reach the machine	☐	☐	☐	
18	I know where the circuit breaker for this room is	☐	☐	☐	

D. Health Practices

#	Item	PASS	FAIL	N/A	Notes
19	I can state the 20-20-20 rule from memory	☐	☐	☐	
20	I stand up and move at least once an hour	☐	☐	☐	
21	I take a proper break away from the screen for meals	☐	☐	☐	
22	I have water within reach (but not over the keyboard)	☐	☐	☐	

E. Information Security at Home

These matter more than people expect. An analyst working from home handles other organisations' security data on a home network.

#	Item	PASS	FAIL	N/A	Notes
23	My screen cannot be read by other people in the room	☐	☐	☐	
24	I lock my screen (Win + L) when I walk away	☐	☐	☐	
25	My computer requires a	☐	☐	☐	

	password or PIN to log in				
26	My Wi-Fi has a password and is not open	☐	☐	☐	
27	I changed the default admin password on my router	☐	☐	☐	
28	Nobody else uses my course account or knows its password	☐	☐	☐	
29	My operating system has current updates installed	☐	☐	☐	
30	Antivirus / Windows Security is switched on	☐	☐	☐	

Summary

- Total PASS: __ / 30
- Total FAIL: __ / 30
- Total N/A: __ / 30

The three items I most need to fix

#	The problem	What I will do about it	By when

Anything I cannot fix myself, and why

(For example: "I do not own a desk", "the only outlet is across the room", "I share this room". Say so — your trainer would rather know.)

Two questions to finish

1. Which of the 30 items surprised you — something you had never thought about?

2. Section E is about information security, not physical safety. Why do you think a security analyst's *home* setup is part of an occupational safety unit?

Signed: _____ Date: ____

This audit is evidence toward unit 400311107 — Follow occupational safety and health policies and procedures. Save it in `Evidence/Day\_01/`.

You will complete a second version of this checklist for the training lab itself when we meet face to face. Both go in your portfolio — an assessor likes seeing that you can apply the same standard in two different environments.
